

EXP NO: 5

POKER ESTIMATION

Aim:

Create Poker Estimation for the user stories - Music Playlist Batch Creator Project.

PokerEstimation

The screenshot displays a user story titled "47 As a user i should be able to create audio playlist as i need" in the Azure DevOps interface. The story is assigned to "Karthick S" and is currently in the "Resolved" state. The "Reason" is "Code complete and unit tests". The "Area" is "Music Playlist Batch Creator" and the "Iteration" is "Music Playlist Batch Creator/Model". The story is updated by "Mallu karthick Balaji Reddy" on Feb 18.

The interface includes several tabs for managing the story:

- Description:** A text area for adding a description.
- Acceptance Criteria:** A text area for adding acceptance criteria.
- Discussion:** A comment box for adding comments. A note indicates: "Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request."
- Planning:** Fields for "Story Points" (3), "Priority" (2), and "Risk".
- Classification:** Fields for "Value area" and "Business".
- Deployment:** A section for tracking releases, with a link to "Releases" and a note about deployment status reporting.
- Development:** A section for linking to Azure Repos, with a link to "commit, pull request or branch" and a note about creating a branch.
- Related Work:** A section for linking to related work items, with a link to "Add link" and a note about the parent item "26 Auto-Playlist Creation Based on user preference" updated on Feb 18.

Result:

The Estimation/Story Points is created for the project using Poker Estimation.
